

# Translational and clinical research coordination / Bergonié Institute

Name	Translational and Clinical Research Coordination	
<b>Coordinator(s)</b>	<b>Céline AUZANNEAU, PhD</b> Coordinator for the translation and clinical research projects Biopathology Department –Bergonié Institute c.auzanneau@bordeaux.unicancer.fr/ +33(0)5 56 33 33 65 website: <a href="https://www.bergonie.fr/diagnostic-et-traitements/laboratoire/">https://www.bergonie.fr/diagnostic-et-traitements/laboratoire/</a>	
<b>Key Activities</b>	<p style="text-align: center;"><b>Research coordination and support</b></p> <ul style="list-style-type: none"> <li>- Advanced knowledge and understanding of the planning, implementation, and management of research operations.</li> <li>- Management and Implementation of multi-institutional clinical and translational research projects and clinical trials</li> </ul> <p style="text-align: center;">► <b>Providing the critical link between the project investigators and the services provided by each unit within the Biopathology Department as well as its dedicated Biological Resources Structure (CRB-IB).</b></p>	
<b>Area of expertises</b>	<p>Based on the structuration and the key expertise and activities within the Biopathology Department, this structure provides each investigators with a tailored and customized research management plan.</p> <p>Currently, this structure is managing more than 20 national clinical studies at the institute initiative, or with academic or industrial promoters.</p> 	
<b>Example of provided services</b>	<ul style="list-style-type: none"> <li>• Knowledge and understanding of policies, procedures, and regulations leading human subject's research and including them in securing approval required for the conduct of research.</li> <li>• Coordinating the expertise and activities of study participants and staff in safely and accurately performing study procedures.               <ul style="list-style-type: none"> <li>• Assess the capacity of recruiting centers to comply with the specifications. Set up a feasibility study if required.</li> <li>• Organize and lead meetings (steering committee, molecular tumor board)</li> </ul> </li> <li>• Accurately preparing and maintaining all documents required for the successful conduct of the translational research.</li> <li>• Identifying and providing equipments, technologies and supplies needed to fulfill project requirements (locally and across multiple sites, if required).</li> <li>• Assuring research information collection and storage in compliance with regulations/policies and good clinical practice.</li> <li>• Drafting and management of study budgets, monitoring efficient invoicing and providing reports to investigators, department administration and funding agencies.               <ul style="list-style-type: none"> <li>• Coordinate the flow of samples and data from patient inclusion to analysis results.</li> </ul> </li> </ul>	
<b>Please state the platform's major publications</b>	Leroy L, <i>et al.</i> . Thyroid. 2019 Dec 31. Croce S <i>et al.</i> Mod Pathol. 2019 Jul;32(7):1008-1022. Cousin S, <i>et al.</i> .
